Toothfish Fact Sheet

TOTAL ALLOWABLE CATCHES

All Toothfish Fisheries Globally

Toothfish are caught in the southern oceans, both inside the area managed by the Commission for the Conservation of Antarctic Marine Resources (CCAMLR), as well as outside the CCAMLR Convention Area.

Total Allowable Catches (TACs) for toothfish fisheries inside the CCAMLR Area are set by CCAMLR according to a comprehensive stock assessment process developed by scientists from CCAMLR member countries. This includes waters within the CCAMLR area which are the Economic Exclusion Zones (EEZs) of CCAMLR member States around sub-Antarctic islands.

TACs for toothfish fisheries outside the CCAMLR Convention Area are set by the coastal State with jurisdiction over those waters.

FISHERY - INSIDE CCAMLR Area	TAC (t)	% by COLTO members
Australia EEZ - Heard & McDonald Islands	2,730	100
CCAMLR 48.3 - South Georgia	1,850	40
CCAMLR 48.4—High Seas	81	100
CCAMLR 48.6—High Seas	400	60
CCAMLR 58.4.1—High Seas	210	60
CCAMLR 58.4.2—High Seas	70	80
CCAMLR 58.4.3a—High Seas	86	100
CCAMLR 88.1 & 88.2—Ross Sea	3,812	60
France EEZ - Crozet Islands	700	100
France EEZ - Kerguelen Islands	5,100	100
South Africa EEZ - Prince Edward & Marion Islands	320	100
FISHERY - OUTSIDE CCAMLR Area		
Argentina EEZ	3,500	100
Australia EEZ—Macquarie Island	455	100
Chile EEZ - industrial	3,090	71
Chile EEZ - artisanal	1,185	0

Toothfish - Sustainable. Healthy. Delicious.
